PROFESSIONAL EXPERIENCE

Teleperformance, Client: Meta - Technical Support Analyst **06/2026 – Present | Ireland**

- Deliver L1/L2 technical and application support, investigating platform issues through structured troubleshooting, system diagnostics and root cause analysis.
- Manage approximately 30 support cases daily, prioritising incidents, resolving issues and coordinating escalations in line with SLA and quality standards.
- Maintain a **98% quality score** through accurate issue resolution, case documentation and adherence to established support procedures.
- Investigate recurring technical issues, analyse system information and collaborate with specialist teams to identify resolutions and improve service reliability.
- Document troubleshooting steps, incident findings and resolutions in CRM systems to maintain accurate records and support knowledge sharing.
- Provide guidance to new team members, share troubleshooting practices and support continuous improvements in team performance.

Covalen Solutions, Client: Allied Irish Bank - Operations Specialist **09/2025 – 06/2026 | Ireland**

- Delivered frontline technical and operational support for digital banking services, troubleshooting account access, authentication and online banking issues.
- Managed approximately 55 customer cases daily, investigating issues using internal banking applications and CRM systems while maintaining service quality and SLAs.
- Diagnosed user-reported issues, validated account information and escalated complex incidents to specialist teams for further investigation.

- Maintained accurate case records and followed GDPR, information security, customer verification and regulatory compliance procedures.
- Supported new team members through process guidance, knowledge sharing and assistance with complex customer enquiries.

Allmax'd -Application Support Specialist **01/2025 – 06/2025 | India**

- Provided L1/L2 application support, diagnosing and resolving software incidents through log analysis, system monitoring and structured troubleshooting.
- Achieved **85%+ first-contact resolution**, resolving application issues efficiently and reducing unnecessary escalations.
- Utilised **AWS CloudWatch** to monitor application performance, investigate system alerts and identify potential service disruptions.
- Collaborated with development and infrastructure teams to investigate recurring incidents, perform root cause analysis and coordinate technical resolutions.
- Supported ITIL-aligned incident and change management processes while maintaining accurate technical documentation and troubleshooting procedures.
- Identified recurring application issues and contributed to service improvements to enhance application stability and support efficiency.

Applegreen -Sales Assistant **09/2023 – 01/2025 | Ireland**

- Supported customers in a high-volume environment, resolving day-to-day queries and providing clear assistance.
- Assisted with onboarding new colleagues by providing guidance on systems, procedures and day-to-day operations.
- Managed competing customer and operational requirements while maintaining service standards.

Qbay Payroll -Business Analyst **01/2023 – 08/2023 | India**

- Gathered and analysed business requirements, documented workflows and translated operational needs into functional requirements.
- Conducted gap analysis and process improvements, contributing to a **20% reduction in rework**.
- Supported user acceptance testing (UAT), defect identification, data validation and post-implementation troubleshooting.
- Collaborated with stakeholders and technical teams to investigate system issues and implement improvements, contributing to a **30% reduction in support tickets**.
- Prepared process documentation, user guides and operational reports to support system adoption and knowledge transfer.
