PROFESSIONAL EXPERIENCE

Teleperformance - Client: Meta | Technical Support Analyst **06/2026 – Present | Dublin, Ireland**

- Provide **L1/L2 technical and application support**, investigating incidents through structured troubleshooting, application diagnostics, logs and system information.
- Triage and manage high-volume incidents, identifying impact and appropriate next actions while working within defined **SLA and quality standards**.
- Achieve a **98% quality score** while operating within a high-volume support environment.
- Perform root cause analysis and escalate complex technical issues to relevant specialist and operational teams when required.
- Maintain accurate records of incidents, troubleshooting actions, escalations, communications and resolutions.
- Monitor application and system information to identify availability, performance and data-related issues.
- Communicate technical issues and resolution steps clearly to technical and non-technical stakeholders.
- Maintain troubleshooting procedures and technical documentation to support consistent resolution and knowledge sharing.

Covalen Solutions, Client: Allied Irish Bank - Operations Specialist **09/2025 – 06/2026 | Ireland**

- Provided **frontline phone-based support** for AIB Phone & Internet Banking, assisting users with digital banking, account access and service-related issues.
- Investigated customer issues using internal banking and CRM systems, reviewing account and case information to identify appropriate resolutions.
- Maintained accurate case records, customer communications and actions while following strict **security, data protection and operational procedures**.
- Triaged issues and escalated complex cases to appropriate internal teams when they fell outside frontline support scope.

- Managed high volumes of customer interactions while meeting defined **SLA, quality and compliance standards**.
- Explained processes and resolutions clearly to customers with varying levels of technical knowledge.
- Supported new team members through floor support, process guidance and knowledge sharing.

Allmax'd -Application Support Specialist **01/2025 – 06/2025 | India**

- Provided application support by diagnosing technical issues through **log analysis, system information and structured troubleshooting**.
- Used **AWS CloudWatch** to monitor application performance and investigate incidents.
- Achieved **85%+ first-contact resolution**, resolving issues where possible before escalation.
- Investigated complex application issues and collaborated with development and infrastructure teams to coordinate resolution.
- Documented troubleshooting steps, technical findings and operational information to support future incident resolution.
- Communicated technical findings clearly to relevant teams and escalated issues requiring specialist intervention.
- Identified recurring technical issues and contributed to continuous service improvement.

Applegreen -Sales Assistant **09/2023 – 01/2025 | Ireland**

- Supported customers in a high-volume environment, resolving day-to-day queries and providing clear assistance.
- Operated POS systems and supported stock and inventory checks, identifying discrepancies and maintaining accurate records.
- Assisted with onboarding new colleagues by providing guidance on systems, procedures and day-to-day operations.
- Managed competing customer and operational requirements while maintaining service standards.

Qbay Payroll -Business Analyst **01/2023 – 08/2023 | India**

- Gathered and analysed business requirements, workflows and operational information to identify issues and improvement opportunities.
- Conducted gap and impact analysis to support process improvements, reducing rework by 20%.
- Produced process documentation and reports for technical and non-technical stakeholders.
- Supported UAT, data validation and defect analysis to ensure solutions met agreed requirements.
- Analysed post-implementation issues and trends, contributing to improvements that reduced support tickets by 30%.
